Elements of Analytical Mechanics-William Holms Chambers Bartlett 1874

Making Democracy Work-Robert D. Putnam 1994-05-27 Why do some democratic governments succeed and others fail? In a book that has received attention from policymakers and civic activists in America and around the world, Robert Putnam and his collaborators offer empirical evidence for the importance of “civic community” in developing successful institutions. Their focus is on a unique experiment begun in 1970 when Italy created new governments for each of its regions. After spending two decades analyzing the efficacy of these governments in such fields as agriculture, housing, and health services, they reveal patterns of associationism, trust, and cooperation that facilitate good governance and economic prosperity.

Organized Crime-Frank Shanty 2008 A comprehensive overview of organized crime looks at the history and daily functioning of organized criminal activities throughout the world as well as the international laws and treaties governing the treatment of these organizations.

A Dictionary of Chemistry and the Allied Branches of Other Sciences. Supplement-Henry Watts 1872

Mafia Organizations-Maurizio Catino 2019-02-07 How do mafias work? How do they recruit people, control members, conduct legal and illegal business, and use violence? Why do they establish such a complex mix of rituals, rules, and codes of conduct? And how do they differ? Why do some mafias commit many more murders than others? This book makes sense of mafias as organizations, via a collative analysis of historical accounts, official data, investigative sources, and interviews. Catino presents a comparative study of seven mafias around the world, from three Italian mafias to the American Cosa Nostra, Japanese Yakuza, Chinese Triads, and Russian mafia. He identifies the organizational architecture that characterizes these criminal groups, and relates different organizational models to the use of violence. Furthermore, he advances a theory on the specific functionality of mafia rules and discusses the major organizational dilemmas that mafias face. This book shows that understanding the organizational logic of mafias is an indispensable step in confronting them.

Philosophical Transactions, Giving Some Accomp of the Present Undertakings, Studies, and Labours of the Ingenious in Many Considerable Parts of the World-1852

Desistance from Sexual Offending-Kelly Richards 2021-12-24 This book explores how Circles of Support and Accountability can reduce sexual reoffending. The release of a notorious sex offender from prison strikes fear into members of the public. Media coverage often provokes further panic, casting such offenders as irredeemable monsters and ticking time bombs, destined to continue preying on innocent children and women. In the West, governments have responded by enacting heavily punitive and exclusionary policies, such as public sex offender registers, indefinite detention, and lifetime correctional supervision. A radically different approach – Circles of Support and Accountability (CoSA) – emerged alongside these measures. CoSA are groups of trained volunteers who collectively resist the exclusionary impulse, instead actively supporting those with sexual offence convictions to re reintegrate into communities. Despite their seemingly counterintuitive nature, the research is clear that CoSA reduce sexual reoffending far better than more popular draconian sex offender management policies. However, little is understood about how CoSA work. This book begins to address this gap by proposing a new way of understanding how CoSA reduce sexual reoffending. Drawing on 65 in-depth interviews with CoSA participants, it offers a new theoretically-informed empirical explanation of CoSA’s capacity to promote desistance from sexual offending, and to turn those convicted of sexual offenders into law-abiding and productive members of the community. Ultimately it is a call to action, demonstrating that we, the community, must play a more central role in integrating people with sexual offence convictions if we desire safer communities for our children and our selves. This work illuminates new directions for research, policy, and practice, and is essential reading for academics and students engaged in the study of criminology and criminal justice, restorative justice, sexual violence, and reentry.
New Series of The Mathematical Repository-Thomas Leybourn 1830

Cosa Nostra: A History of the Sicilian Mafia-John Dickie 2015-03-31 The Italian-American mafia has its roots in a mysterious and powerful criminal network in Sicily. While the mythology of the mafia has been widely celebrated in American culture, the true origins of its rituals, laws, and methods have never actually been revealed. John Dickie uses startling new research to expose the secrets of the Sicilian mafia, providing a fascinating account that is more violent, frightening, and darkly comic than anything conceived in popular movies and novels. How did the Sicilian mafia begin? How did it achieve its powerful grip in Italy and America? How does it operate today? From the mafia's origins in the 1860s to its current tense relationship with the Berlusconi government, Cosa Nostra takes us to the inner sanctum where few have dared to go before. This is an important work of history and a revelation for anyone who ever wondered what it means to be "made" in the mob.

Elements of Trigonometry-Charles Hackley 2012-03

American Literature and Science-Robert Scholnick 2021-10-21 Literature and science are two disciplines are two disciplines often thought to be unrelated, if not actually antagonistic. But Robert J. Scholnick points out that these areas of learning, up through the beginning of the nineteenth century, "were understood as parts of a unitary endeavor." By mid-century they had diverged, but literature and science have continued to interact, conflict, and illuminate each other. In this innovative work, twelve leaders in this emerging interdisciplinary field explore the long engagement of American writers with science and uncover science's conflicting meanings as a central dimension of the nation's conception of itself. Reaching back to the Puritan poet-minister-physician Edward Taylor, who wrote at the beginning of the scientific revolution, and forward to Thomas Pynchon, novelist of the cybernetic age, this collection of original essays contains essential work on major writers, including Franklin, Jefferson, Poe, Emerson, Thoreau, Twain, Hart Crane, Dos Passos, and Charles Olson. Through its exploration of the ways that American writers have found in science and technology a vital imaginative stimulus, even while resisting their destructive applications, this book points towards a reconciliation and integration within culture. An innovative look at a neglected dimension of our literary tradition, American Literature and Science stands as both a definition of the field and an invitation to others to continue and extend new modes of inquiry.

The Improvement and Reform of Law Enforcement and Criminal Justice in the United States-United States. Congress. House. Select Committee on Crime 1969 Considers improvement of the criminal justice and law enforcement systems, with emphasis on correction and rehabilitation, along with a more effective court system and police force.

A Companion to the Archaeology of the Roman Republic-Jane DeRose Evans 2013-03-29 A Companion to the Archaeology of the Roman Republic offers a diversity of perspectives to explore how differing approaches and methodologies can contribute to a greater understanding of the formation of the Roman Republic. Brings together the experiences and ideas of archaeologists from around the world, with multiple backgrounds and areas of interest Offers a vibrant exploration of the ways in which archaeological methods can be used to explore different elements of the Roman Republic period Demonstrates that the Republic was not formed in a vacuum, but was influenced by non-Latin-speaking cultures from throughout the Mediterranean region Enables archaeological thinking in this area to be made accessible both to a more general audience and as a valuable addition to existing discourse Investigates the archaeology of the Roman Republic period with reference to material culture, landscape, technology, identity and empire.
