From Rebel to Ruler-Tony Saich 2021-07-06 On the centennial of the founding of the Chinese Communist Party, the definitive history of how Mao and his successors overcame incredible odds to gain and keep power. Mao ZeDong and the twosome other young men who founded the Chinese Communist Party in 1921 could hardly have imagined that less than thirty years later they would be rulers. On its hundredth anniversary, the party remains in command, leading a nation primed for global dominance. Tony Saich tells the authoritative, comprehensive story of the Chinese Communist Party—its rise to power against incredible odds, its struggle to consolidate rule and overcome self-inflicted disasters, and its thriving amid other Communist parties’ collapse. Saich argues that the brutal Japanese invasion in the 1930s actually helped the party. As the Communists retreated into the countryside, they established themselves as the populist, grassroots alternative to the Nationalists, gaining the support they would need to triumph in the civil war. Once in power, however, the Communists faced the difficult task of learning how to rule. Saich examines the devastating economic consequences of Mao’s Great Leap Forward and the political chaos of the Cultural Revolution, as well as the party’s refound under Deng Xiaoping’s reforms. Leninist systems are thought to be rigid, yet the Chinese Communist Party has proved adaptable. From Rebel to Ruler shows that the party owes its endurance to its flexibility. But if it muddle enough to realize Xi Jinping’s “China Dream”? Challenges are multiplying, as the growing middle class makes new demands on the state and the ideological retreat from communism draws the party further from its revolutionary roots. The legacy of the party may be secure, but its future is anything but guaranteed.

The Coming Collapse of China—Gordon G. Chang 2001-09-15 China is hot. The world sees a glorious future for this sleeping giant. Three times larger than the United States, predicting it will blossom into the world’s biggest economy by 2010. According to Chang, however, a Chinese-American lawyer and China specialist, the People’s Republic is a paper dragon. Peer beneath the veneer of modernization since Mao’s death, and the symptoms of decay are everywhere: Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing’s cautious reforms have left the country stuck midway between communism and capitalism, Chang writes. With its impending World Trade Organization membership, for the first time China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse. Covering subjects from party politics to the Falun Gong to the government’s inapprachable position on Taiwan, Chang presents a thorough and very chilling overview of China’s present and not-so-distant future.
