Progressive Punishment
Judah Schept 2015
The growth of mass incarceration in the United States eludes neat categorization as a product of the political Right. Liberals played important roles in both laying the foundation for and then participating in the conversation about crime and punishment. In Progressive Punishment, Schept examines the ways that liberal discourses about therapeutic justice and rehabilitation could signal the logic, politics, and institutions that comprised the carceral state. Schept examines three liberal regimes—President Calvin Coolidge’s (1923-1929), President Franklin Delano Roosevelt’s (1933-1945), and President Lyndon Johnson’s (1963-1969)—as the liberal carceral state reemerged and expanded, as the carceral state reemerged, as the carceral state reemerged.

integrating popular politics and elite policymaking. Unlike most social historians who focus exclusively on consumers at the grass-roots, Jacobs breaks new methodological ground by insisting on the centrality of national politics and the state in explaining consumer activism. Her book provides an ambitious interpretation of the intersection of policy and politics in the history of consumerism. It is a must-read for anyone interested in understanding how consumer movements have been shaped and constrained by the political and economic forces that have shaped them.
