Creating Positive Race Relations-Taylor Cox Jr. 2020-11-20 This workbook responds to one of the defining issues of our time, namely how to counter racial division and effect positive change in inter-racial relations. It provides a tool for personal learning as well as for team and organizational development on the subject of racial dynamics. It is designed to assist individuals, groups and organizations to take action in the interest of creating and nurturing positive race relations. Based on the insights and experiences of twelve contributors, the book offers a clearly defined 12 step process for learning and action. It responds directly to the call coming from many quarters in recent months for a plan of action to change how race impacts life in the United States and other countries with racially diverse populations. Although targeted specifically to address racial conflict and division, the principles in the book have application to other forms of societal tensions such as exist in the political, economic and law enforcement areas.

Race Relations-Stephen Steinberg 2007-07-17 Stephen Steinberg offers a bold challenge to prevailing thought on race and ethnicity in American society. In a penetrating critique of the famous race relations paradigm, he asks why a paradigm invented four decades before the Civil Rights Revolution still dominates both academic and popular discourse four decades after that revolution. On race, Steinberg argues that even the language of "race relations" obscures the structural basis of racial hierarchy and inequality. Generations of sociologists have unwittingly practiced a "white sociology" that reflects white interests and viewpoints. What happens, he asks, when we foreground the interests and viewpoints of the victims, rather than the perpetrators, of racial oppression? On ethnicity, Steinberg turns the tables and shows that the early sociologists who predicted ultimate assimilation have been vindicated by history. The evidence is overwhelming that the new immigrants, including Asians and most Latinos, are following in the footsteps of past immigrants—footsteps leading into the melting pot. But even today, there is the black exception. The end result is a dual melting pot—one for peoples of African descent and the other for everybody else. Race Relations: A Critique cuts through layers of academic jargon to reveal unsettling truths that call into question the nature and future of American nationality.

What Parish Are You From? Eileen M. McMahon 2021-12-14 For Irish Americans as well as for Chicago's other ethnic groups, the local parish once formed the nucleus of daily life. Focusing on the parish of St. Sabina's in the southwest Chicago neighborhood of Auburn-Gresham, Eileen McMahon takes a penetrating look at the response of Catholic ethics to life in twentieth-century America. She reveals the role the parish church played in achieving a cohesive and vital ethnic neighborhood and shows how ethnoreligious distinctions gave way to racial difference as a central point of identity and conflict. For most of this century the parish served as an important mechanism for helping Irish Catholics cope with a dominant Protestant-American culture. Anti-Catholicism in the society at large contributed to dependency on parishes and to a desire for separateness from the American mainstream. As much as Catholics may have wanted to insulate themselves in their parish communities, however, Chicago demographics and the fluid nature of the larger society made this ultimately impossible. Despite efforts at integration attempted by St. Sabina's liberal clergy, white parishioners viewed black migration into their neighborhood as a threat to their way of life and resisted it even as they relocated to the suburbs. The transition from white to black neighborhoods and parishes is a major theme of twentieth-century urban history. The experience of St. Sabina's, which changed from a predominantly Irish parish to a vibrant African-American Catholic community, provides insights into this social trend and suggests how the interplay between faith and ethnicity contributes to a resistance to change.

Toward a Common Destiny-Willis D. Hawley 1995-05-04 Presents a variety of alternative strategies for improving racial and ethnic relations and reducing intolerance and discrimination. The authors, who are some of the most thoughtful scholars in the field, include a five-part plan of action and techniques to assess the effectiveness of each strategy.

Ethnic Relations in the Baltic States-Toivo U. Raun 1994

Why Are All the Black Kids Sitting Together in the Cafeteria? Beverly Daniel Tatum 2017-09-05 The classic, bestselling book on the psychology of racism -- now fully revised and updated Walk into any racially mixed high school and you will see Black, White, and Latino youth clustered in their school and you will see Black, White, and Latino youth clustered in their own groups. Is this self-segregation a problem or address a coping strategy? Beverly Daniel Tatum, a renowned authority on the psychology of racism, argues that straight talk about our racial identities is essential if we are serious about enabling communication across racial and ethnic divides. These topics have only become more urgent as the national conversation about race is increasingly acrimonious. This fully revised edition is essential reading for anyone seeking to understand the dynamics of race in America.

Raciolinguistics-H. Samy Alim 2016-09-30 Raciolinguistics reveals the central role that language plays in shaping our ideas about race and vice versa. The book brings together a team of leading scholars working both within and beyond the United States to share powerful, much-needed research that helps us understand the increasingly vexed relationships between race, ethnicity, and language in our rapidly changing world. Combining the innovative, cutting-edge approaches of race and ethnic studies with fine-grained linguistic analyses, authors cover a wide range of
topics including the struggle over the very term "African American," the racialized language education debates within the increasing number of "majority-minority" immigrant communities in the U.S., the dangers of multicultural education in a Europe that is struggling to meet the needs of new immigrants, and the sociopolitical and cultural meanings of linguistic styles used in Brazilian favelas, South African townships, Mexican and Puerto Rican barrios in Chicago, and Korean American "cram schools" in New York City, among other sites. Taking into account rapidly changing demographics in the U.S. and shifting cultural and media trends across the globe—from Hip Hop cultures, to transnational Mexican popular and street cultures, to Israeli reality TV, to new immigration trends across Africa and Europe—Racializing Geographies shapes the future of scholarship on race, ethnicity, and language. By taking a comparative look across a diverse range of language and literacy contexts, the volume seeks not only to set the research agenda in this burgeoning area of study, but also to help resolve pressing educational and political problems in some of the most contested racial-linguistic contexts in the world.

Immigration and Ethnic Relations in the U.S.: Takeyuki Tsuda 2016-09-30 The dramatic increase in immigration from Latin American and Asian countries in the last several decades is profoundly reshaping race and ethnic relations in the United States, the world’s premier nation of immigrants. Immigration and Ethnic Relations in the U.S. contains a series of accessible readings written by an interdisciplinary group of leading scholars that will provide undergraduate students with an introductory overview of various topics related to immigration to the United States. These topics include the causes of migration, its political, economic, and social impact, and its transnational, identity, gender, diasporic, and citizenship consequences for immigrants and refugees. The anthology then examines the ethnic diversity created by immigration through a collection of readings that cover a range of immigrant groups in the United States and provide overviews of both older and newer immigrant-origin ethnic groups including White Americans, African Americans, Hispanic Americans, and Asian Americans. Although race and ethnic relations in the United States can only be understood in the context of immigration, there are few anthologies that cover both topics. Takeyuki Tsuda is an associate professor in the School of Human Evolution and Social Change at Arizona State University. After receiving his Ph.D. in anthropology in 1997 from the University of California at Berkeley, he was a collegiate assistant professor at the University of Chicago. He then served as associate director of the Center for Comparative Immigration Studies at the University of California at San Diego. His primary academic interests include international migration, diasporas, ethnic minorities, and transnationalism and globalization, ethnic return migrants, and the Japanese diaspora in the Americas.

Race in America—Susan Henneberg 2017-01-01 Many Americans believe they’re living in a post-racial society, pointing to the election of Barack Obama to the presidency as evidence. Others believe that, despite the advances achieved by the civil rights movement, people of color are treated as second-class citizens. Is race overemphasized in America? Have government programs and policies done enough to level the playing field? Can the United States, a country that lives by the credo that all men are created equal, ever overcome its legacy of racism? Readers of this multifaceted anthology will be given the tools to form their own opinions about these complex issues.

Race and Racism in International Relations—Alexander Aneivas 2014-10-30 International Relations, as a discipline, does not grant race and racism explanatory agency in its conventional analyses, despite such issues being integral to the birth of the discipline. Race and Racism in International Relations seeks to remedy this oversight by acting as a catalyst for remembering, exposing and critically re-articulating the central importance of race and racism in International Relations. Focusing especially on the theoretical and political legacy of W.E.B. Du Bois’s concept of the “colour line”, the cutting edge contributions in this text provide an accessible entry point for both International Relations students and scholars into literature that has borrowed from race in disciplines such as history, anthropology and sociology where race and theory figures more prominently; yet they also suggest that the field of IR is itself an intellectually and structurally field through which to further confront the global colour line. Drawing together a wide range of contributors, this much-needed text will be essential reading for students and scholars in a range of areas including Postcolonial studies, race/racism in world politics and international relations theory.

The Negro in Chicago—Chicago Commission on Race Relations 1922

Race Relations at the Margins—Jeff Forret 2006-07-01 Covering a broad geographic scope from Virginia to South Carolina between 1820 and 1860, Jeff Forret scrutinizes relations among rural poor whites and slaves, a subject previously unexplored and certainly under-reported. Forret’s findings challenge historians’ long-held assumption that mutual violence and animosity characterized the two groups’ interactions; he reveals that while poor whites and slaves sometimes experienced bouts of hostility, often they worked or played in harmony and camaraderie. Race Relations at the Margins is remarkable for its focus on lower-class whites and their dealings with slaves outside the purview of the master. Race and class, Forret demonstrates, intersected in unique ways for those at the margins of southern society, challenging the belief that race created a social cohesion among whites regardless of economic status. Forret’s magnificent, colonial-era flexibility in race relations never entirely disappeared despite the institutionalization of slavery and the growing rigidity of color lines. His book offers a complex and nuanced picture of the shadowy world of slave–poor white interactions, demanding a refined understanding and new appreciation of the range of interracial associations in the Old South.

Sociology, Race, and Ethnicity-Harry H. Bash 1979 Presenting an analysis of American assimilation theory Bash attempts to dissect the concept and what it has come to mean in the United States. After tracing the “natural history” of the assimilation notion and later its theoretical elaboration, he explores far more theoretical linkages by way of concept formation and theory construction in the area of racial and ethnic group relations.

Leading for Diversity-Rosemary Henze 2002-07-11 The authors provide powerful models of leaders that are effective in developing schools where positive interethnic relations can flourish.

America Becoming-National Research Council 2001-02-23 The 20th Century has been marked by enormous change in terms of how we define race. In large part, we have thrown out the antiquated notions of the 1800s, giving way to a more realistic, sociocultural view of the world. The United States is, perhaps more than any other industrialized country, distinguished by the size and diversity of its racial and ethnic minority populations. Current trends promise that these features will endure. Fifty years from now, there will most likely be no single majority group in the United States. How will we fare as a nation when race-based issues such as immigration, job opportunities, and affirmative action are already so contentious today? In America Becoming, leading scholars and commentators explore past and current trends among African Americans, Hispanics, Asian Americans, and Native Americans in the context of a white majority. This volume presents the most up-to-date findings and analyses on racial and social dynamics, with recommendations for ongoing research. It examines compelling issues in the field of race relations, including: Race and ethnicity in criminal justice. Demographic and social trends for Hispanics, Asian Americans, and Native Americans in the context of a white majority. This volume presents the most up-to-date findings and analysis on racial and social dynamics, with recommendations for ongoing research.

Won’t You Be My Neighbor-Camille Zubiarnsky Charles 2006-10-19 Los Angeles is a city of delicate racial and ethnic balance. As evidenced by the 1965 Watts violence, the 1992 Rodney King riots, and this year's award-winning film Crash, the city's myriad racial groups coexist uneasily together, often on the brink of confrontation. In fact, Los Angeles is highly segregated, with racial and ethnic groups clustered in homogeneous neighborhoods. These residential groupings have profound effects on the economic well-being and quality of life of residents, dictating which jobs they can access, which social networks they can tap in to, and which schools they attend. In Won't You Be My Neighbor?, sociologist Camille Zubiarnsky Charles explores how modern racial attitudes shape and are shaped by the places in which people live. Using in-depth survey data and information from focus groups with members of L.A.'s largest racial and ethnic groups, Won't You Be My Neighbor? explores why Los Angeles remains a segregated city, compiled and edited by distinguished leaders in the behavioral and social sciences, represents the most current literature in the field. Volume 1 covers demographic trends, immigration, racial attitudes, and the geography of opportunity. Volume 2 deals with the criminal justice system, the labor market, welfare, and health trends. Both books will be of great interest to educators, scholars, researchers, students, social scientists, and policymakers.

White Fragility-Robin DiAngelo 2018-06-26 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’” (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

American Ethnicity: The Dynamics and Consequences of Discrimination-Jonathan H. Turner 2010-11-23 American Ethnicity is a brief text that provides an accessible introduction to the dynamics of racial and ethnic relations. Key concepts and theories are summarized, and the authors develop a simple theoretical framework that guides the presentation of data on each of the prominent ethnic groups in America. As a result, this book examines each ethnic group from the same perspective, allowing students to compare the dynamics of discrimination against African Americans, Native Americans, Asian, and Pacific Island Americans, white ethnic Americans, and Latinos.

The Color of Law: A Forgotten History of How Our Government Segregated America-Richard Rothstein 2017-05-02 New York Times Bestseller * Notable Book of the Year * Editors' Choice Selection One of Bill Gates’ “Amazing Books” of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner of California Book Awards History Finalist Los Angeles Times Book Prize (History) Finalist * Brooklyn Public Library Literary Prize This "powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein’s The Color of Law offers “the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation” (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), The Color of Law forces us to face the obligation to remedy our unconstitutional past.

Understanding Racial and Ethnic Differences in Health in Late Life-National Research Council 2004-09-08 As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.
Critical Perspectives on Racial and Ethnic Differences in Health in Late Life-National Research Council 2004-10-16 In their later years, Americans of different racial and ethnic backgrounds are not in equally good—or equally poor—health. There is wide variation, but on average older Whites are healthier than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents racial and ethnic health disparities and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health disparities originate early in life, possibly even before birth, and are affected by events and experiences throughout the life course. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life.

Racial Attitudes in the 1990s-Steven A. Tuch 1997 This collection of essays by leading race relations experts addresses key issues and debates in the literature and includes chapters on the racial attitudes of both whites and African-Americans.

The Black and White of Racism-Waylon Allen 2017-03-21 This book challenges much of what we, as Americans, think about Race and Racism in our Nation. The true, often untold and unknown, history of slavery and the mutual experience we all shared as Americans is revealed in a manner that unites the races rather than divides. Rather than blame and guilt, the book explains why we all should appreciate the struggle each race made together in founding the United States of America. The author also identifies an insidious verbal description, that most of us use often in our discussion about one another, that makes it impossible for us to come together as a united citizenry. Suggestions to resolve many of our problems relating to race relations are offered in this thoughtful and constructive commentary. Did you know that the first official slave owner in Colonial America was a “Black” African? Did you know that there were many “Black” slave owners in early America up until the time of the Civil War? Did you know that there were many “White” slaves that came from Europe? Did you know that Slavery still exists today in some countries? These are some of the surprising facts the author discovered while researching racism and race relations in early America through today. When his teenage granddaughter mentioned that she did not like a group of people with a certain skin color, the author decided to respond to her with a letter against racism. After looking deeper into the subject, he realized that the true facts and the current perception of the facts were different. He came to feel that he had been misinformed over the years and misled by the general consensus regarding what actually occurred from the time of the initial settling of the Colonies until the Civil War regarding slavery. The letter evolved into this "Commentary" regarding racism and race relations. He came to the conclusion that we, as a Nation, cannot resolve our racial divisions until the real truth is known and realized by all American citizens. He states that, “Hidden in the actual truth is the resolution for the animosity and resentment that separates us as a united people.” The author provides informative insight into how racism is maintained in a manner that affects almost all American citizens today and how we can join together to resolve what he calls this “racialist affliction” that grips our Nation. Reasons for alarm are cited and solutions are suggested in this challenging but refreshing commentary about the very difficult issue of racism and race relations in America. -- Ray Bennett

Measuring Racial Discrimination-National Research Council 2004-07-24 Many racial and ethnic groups in the United States, including blacks, Hispanics, Asians, American Indians, and others, have historically faced severe discrimination—pervasive and open denial of civil, social, political, educational, and economic opportunities. Today, large differences among racial and ethnic groups persist due to existing economic, educational, and political disparities. The 9th Edition includes fully updated data as well as coverage of contemporary issues such as the #BlackLivesMatter movement and changing attitudes toward refugees - that help students see the relevance of course material to today's world. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life. The book conducts a thorough evaluation of current methodologies for a wide range of circumstances in which racial discrimination may occur, and makes recommendations on how to better assess the presence and effects of discrimination.

The Sum of Us-Heather McGhee 2021-02-16 NEW YORK TIMES BESTSELLER • One of today’s most insightful and influential thinkers offers a powerful exploration of inequality and the lesson that generations of Americans have failed to learn: Racism has a cost for everyone—not just for people of color. “This is the book I’ve been waiting for.”—Ibram X. Kendi, #1 New York Times bestselling author of How to Be an Antiracist Heather McGhee’s specialty is the American economy—and the mystery of why it so often fails the American public. From the financial crisis to rising student debt to collapsing public infrastructure, she found a common root problem: racism. But not just in the most obvious industries for people of color. Racism has costs for white people, too. It is the common denominator of our most vexing public problems, the core dysfunction of our democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and grease. This is the story of how public goods in this country—from parks and pools to functioning schools—have become private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world’s advanced economies, has thwarted universal healthcare. But in unlikely places of worship and work, McGhee finds proof of what she calls the Solidarity Dividend: gains that come when people come together across race, to accomplish what we simply can’t do on our own. The Sum of Us is a brilliant analysis of how we arrived here; divided and self-destructing, materially rich but spiritually starved and vastly unequal. McGhee marshals economic and sociological research to paint an irrefutable story of racism’s costs, but at the heart of the book are the humble stories of people yearning to be part of a better America, including white supremacy’s collateral victims: white people themselves. With startling empathy, this heartfelt message from a Black woman to a multiracial America leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game.

Ethnic Relations in Canada-Raymond Breton 2005-10-13 This collection of Raymond Breton’s essential writings highlights his work on French-English relations in Canada, examining the social origins of Quebec’s Quiet Revolution, the different forms of English-Canadian and Quebec nationalism, the relationship between linguistic and regional divisions, and the dynamics of recurring constitutional crisis. Breton’s writings on ethnic relations range of immigration consider the dynamics, political nature, and impact of immigrant ethnic communities and the origins of multiculturalism. He also explores the integration of immigrant ethnic communities across linguistic boundaries and the status of Aboriginal Canadians.

But increased contact among individuals from different racial and ethnic groups has not put an end to misunderstanding and conflict. On the contrary, entrenched cultural differences raise vexing questions about the limits of American pluralism. Can a population of increasingly mixed origins learn to live and work together despite differing cultural backgrounds? Or, is social polarization by race and ethnicity inevitable? These are the dilemmas explored in Cultural Divides, a compendium of the latest research into the origins and nature of group conflict, undertaken by a distinguished group of social psychologists who have joined forces to examine the effects of culture on social life. Cultural Divides shows how new insights into the nature of group conflict shape current thinking on such questions as: Why are so people strongly prone to attribute personal differences to group membership rather than to individual nature? Why are negative beliefs about other groups so resistant to change, even with increased contact? Is it possible to struggle toward equal status for all people and still maintain separate ethnic identities for culturally distinct groups? Cultural Divides offers new theories about how social identity comes to be rooted in groups: Some essays describe the value of group membership for enhancing individual self-esteem, while others focus on the belief in social hierarchies, or the perception that people of different skin colors and ethnic origins fall into immutably different categories. Among the phenomena explored are the varying degrees of commitment and identification felt by many black students toward their educational institutions, the reasons why social stigma affects the self-worth of some minority groups more than others, and the peculiar psychology of hate crime perpetrators. The way cultural boundaries can impair our ability to resolve disputes is a recurrent theme in the volume. An essay on American cultures of European, Asian, African, and Mexican origin examines core differences in how social thought processes shape the formation of group identity and intergroup antagonism. In so doing, Cultural Divides points the way toward a new science of cultural contact and confronts issues of social change that increasingly affect all Americans.

Have We Overcome?-Chancellor's Symposium on Southern History (4th : 1978 : University of Mississippi) 1979 Have We Overcome? Race Relations Since Brown, 1954-1979 edited by Michael V. Namorato essays by Lerone Bennett, Jr., Vincent Harding, Morton J. Horwitz, William E. Leuchtenburg, Henry M. Levin, C. Eric Lincoln, and Robert H. Wiebe On May 17, 1954, the United States Supreme Court rendered the first of two historic decisions in Brown v. Board of Education of Topeka. One year later, the conclusion to a second case demanded that integration proceed “with all deliberate speed.” These two verdicts affected American life far beyond the schools and proved the beginning of the end to the segregated South. The essays in Have We Overcome? Race Relations Since Brown, 1954-1979, delivered by major scholars just after America’s bicentennial and on the twenty-fifth anniversary of the Brown decision, endeavor to answer that question and determine what strides have been made and what remains to be overcome. This book is the final volume in a three-part investigation which begins with What Was Freedom’s Price? and includes The Age of Segregation: Race Relations in the South, 1890-1945. All three are available again in paperback from University Press of Mississippi. Michael V. Namorato is a professor of history at the University of Mississippi.

An American Dilemma-Gunnar Myrdal 2017-11-13 In this landmark effort to understand African American people in the New World, Gunnar Myrdal provides deep insight into the contradictions of American democracy as well as a study of a people within a people. The title of the book, 'An American Dilemma', refers to the moral contradiction of a nation torn between allegiance to its highest ideals and awareness of the base realities of racial discrimination. The touchstone of this classic is the jarring discrepancy between the American creed of respect for the inalienable rights to freedom, justice, and opportunity for all and the pervasive violations of the dignity of blacks. The appendices are a gold mine of information, theory, and methodology. Indeed, two of the appendices were issued as a separate work given their importance for systematic theory in social research. The new introduction by Sissela Bok offers a remarkably intimate yet rigorously objective appraisal of Myrdal—a social scientist who wanted to see himself as an analytic intellectual, yet had an unbinding desire to bring about change. 'An American Dilemma' is testimonial to the man as well as the ideas he espoused. When it first appeared 'An American Dilemma' was called “the most penetrating and important book on contemporary American civilization” by Robert S. Lynd, “One of the best political commentaries on American life that has ever been written” in The American Political Science Review; and a book with "a novelty and a courage seldom found in American discussions either of our total society or of the part which the Negro plays in it” in 'The American Sociological Review'. It is a foundation work for all those concerned with the history and current status of race relations in the United States.
