**The Possibility of an Absolute Architecture**
Pier Vittorio Aureli 2011 "What at first glance appears to be a book of architectural history is in fact a radical attack on theory, sweeping away the foundations of current thought in its wake. Aureli's work stands against the forces of an unlimited urbanization, proposing an idea of absolute architecture as a confrontation with the forces of global capital. A must read for those passionate about architecture and its future." Peter Eisenman.

**Empire of Dirt**
Wendy Fonarow 2015-09-01 Britain is widely considered the cradle of independent music culture. Bands like Radiohead and Belle and Sebastian, which epitomize indie music’s sounds and attitudes, have spawned worldwide fanbases. This in-depth study of the British independent music scene explores how the behavior of fans, artists, and music industry professionals produce a community with a specific aesthetic based on moral values. Author Wendy Fonarow, a scholar with years of experience in the various sectors of the indie music scene, examines the indie music “gig” as a ritual in which all participants are actively involved. This ritual allows participants to play with cultural norms regarding appropriate behavior, especially in the domains of sex and creativity. Her investigation uncovers the motivations of audience members when they first enter the community and how their positions change over time so that the gig functions for most members as a rite of passage. Empire of Dirt sheds new light on music, gender roles, emotion, subjectivity, embodiment, and authenticity.

**The Invention of the Model**
Susan Waller 2017-07-05 Although mastery of the representation of the human figure was central to art making as early as the fifteenth century in Europe, in the nineteenth-century French imagination the artist’s model became identified as a distinct social type and cultural trope. This study of the artist’s model in Paris between 1830 and 1870 incorporates three histories: a social history of professional models, a cultural history of models as social types, and an art history of representations of the model in elite and popular visual culture. It takes as its starting point the artist-model transaction: demonstrating that stereotypes of ‘the model’ that figured in the public imagination were framed both by gender and ethnicity, the book develops a nuanced typology of different types of models. Interwoven with the analysis of the constructed identities of models are accounts of the lives of particular models and the histories of the urban population groups from which they emerged. The Invention of the Model: Artists and Models in Paris, 1830-1870 is an adept exploration of a major issue in nineteenth-century art which will be of interest not only to art historians, but also to social and French cultural historians.

**Buddhism in Australia**-Cristina Rocha 2010-12-07 The number of Buddhists in Australia has grown dramatically in recent years. In 2006, Buddhists accounted for 2.1 per cent of Australia’s population, almost doubling the 1996 figures, and making it the fastest growing religion in the country. This book analyses the arrival and localisation of Buddhism in Australia in the context of the globalisation of Buddhism. Australia’s close geographical proximity to Asia has encouraged an intense flow of people, ideas, practices and commodities from its neighbouring countries, while at the same time allowing the development of the religion to be somewhat different to its growth in other Western countries. The book seeks to explore the Buddhist experience in Australia, looking at the similarities and particularities of this experience in relation to other Western countries. The inception of Buddhism in Australia is investigated, and a voice is provided to people on the ground who have been fundamental in making this process possible. For the first time, academic analysis and practitioners’ experience are juxtaposed to show the adaptations and challenges of Buddhism in Australia from above and below. This book is a unique and valuable contribution to the study of Buddhism in the West, globalization of religion, and studies in Asian Religion.

**Opera and the Culture of Fascism**-Jeremy Tambling 1996 This study looks at nineteenth- and early twentieth-century opera as part of a culture which produced fascism as a crisis-state, and threatened to extinguish the genre as an influential and contemporary high form of art altogether. Jeremy Tambling highlights the themes of the cultural crisis through a detailed discussion of some dozen operas and a general overview of the works of Wagner, Verdi, Puccini, Strauss, and others, drawing on the writings of Nietzsche, Adorno, Benjamin, and Heidegger, for an understanding of the ideological background. Reading fascism as a political, intellectual, and psychological phenomenon, the author draws on the works of Bataille, Theweilet, and Kristeva, for discussion of proto-fascist and fascist thought, and for its relation to gender-politics. Resisting the cliches about Wagner or Strauss’s relationship to the Third Reich, Tambling takes the opera out the hermetically sealed-off state in which it is normally discussed, and presents it as both central to debates on totalitarian states and their associated repression, and as a reaction to the reactionary and repressive pressures that made up the ‘culture of fascism’, and those that tried to make opera part of the ‘fascism of culture’.

**Art Nouveau Tiles**-Hans van Lemmen 2009-02-17 At the turn of the last century, Art Nouveau, characterised by its natural, swirling lines and exuberant use of colour, held sway as the dominate style in architecture and design. The style defined the Edwardian period, with its departure from more formal Victorian styles. The leading tile manufacturers of the day seized on the popularity of the new style and introduced extensive ranges of Art Nouveau tiles, many of them mass-produced in Stoke-on-Trent, the centre of the British pottery industry. The author charts the impact of this sensuous style on the tile industry in Britain showing how tiles were made and decorated, and describes the innovations of designers such as Lewis Day and William Neatby. With photographs of the tiles, individually and in situ in public buildings and homes, the author examines the diverse range of floral, animal and human subject matter found on Art Nouveau tiles that now make them so appealing to collectors and design historians.

**Religion and the Subtle Body in Asia and the West**-Geoffrey Samuel 2013-04-12 Subtle-body practices are found particularly in Indian, Indo-Tibetan and East Asian societies, but have become increasingly familiar in Western societies, especially through the various healing and yoga techniques and exercises associated with them. This book explores subtle-body practices from a variety of perspectives, and includes both studies of these practices in Asian and Western contexts. The book discusses how subtle-body practices assume a quasi-material level of human existence that is intermediate between conventional concepts of body and mind. Often, this level is conceived of in terms of an invisible structure of channels, associated with the human body, through which flows of quasi-material substance take place. Contributors look at how subtle-body concepts form the basic explanatory structure for a wide range of practices. These include forms of healing, modes of exercise and martial arts as well as religious practices aimed at the refinement and transformation of the human mind/body complex. By highlighting how subtle-body practices of many kinds have been introduced into Western societies in recent years, the book explores the possibilities for new models of understanding which these concepts open up. It is a useful contribution to studies on Asian Religion and Philosophy.

**The Art of Being a Tiger**-Ana Luisa Amaral 2016 Ana Luisa Amaral is considered to be one of the foremost Portuguese poets of her day, and although her poetry has been translated into many other languages, this is the first major collection of her poems to be published in English. Born in Oporto in 1956, and, for many years, Professor of Anglo-American Literature at the University of Oporto, Ana Luisa Amaral published her first collection of poems, Minha Senhora de Que, in 1990, and has since published many more, along with plays, children’s literature, a novel and translations from English. Her work has brought her many prizes both in Portugal and elsewhere. Her poems are resolutely female, but she casts her net very wide in terms of subject matter, from tender poems about her daughter to thoughts provoked by finding a crumb lodged in the pages of a secondary school book to musings about Galileo, the secrets of the universe, and the larger themes of loneliness, loss, and death. She is a writer immersed in her own culture, but steeped, too, in the poetry, for example, of Emily Dickinson and Shakespeare, and in the world of the Bible and the Greek myths. The result is a poetry that takes equal pleasure in the physical and metaphysical, playing with words and ideas, a poetry that is always refreshingly oblique, taking the reader down unexpected intellectual and linguistic paths. Her poetry invites readers to share her own wonder and perplexity at life’s joys and griefs.

**The Looshaus**-Christopher Long 2011 When it was completed in 1911, the
Goldman & Salatsch Building in Vienna, commonly known as the Looshaus, incited controversy for its austerity and plainness. It represented a stark rejection of the contemporary preference for ornamentation, though its architect, Adolf Loos (1870–1933), had intended it to preserve Viennese tradition within a new modernist language. The heated debate that ensued among critics and the public set the project apart, distinguishing it as one of the most important and contentious buildings of the early 20th century. In celebration of the Looshaus’s centennial year, Christopher Long, a leading authority on Viennese architectural history, brings to light extensive new research and careful analysis that dispel long-held myths about Loos, his building, and its critical reception. The book, which features new color photography and a vast array of archival materials in print for the first time, tells the remarkable story of the Looshaus’s design and construction, the political and social restlessness it reflected, and the building’s fundamental role in defining the look of modernism.

Marvelous Encounters—Willard Bohn 2005 The concept of poesie critique - poetry that possesses both a poetic and a critical function - has an extensive history in modern literature. Written in response to another work of art, be it a painting, a film, a poem, or a piece of music, the critical poem comments on the latter in various ways but refuses to abandon its poetic mission. Marvelous Encounters examines surrealist poets writing in French, Spanish, and Catalan who experimented with this intriguing genre. The first three chapters are concerned with the French surrealists, who began to cultivate critical poetry toward the end of World War 1. Chapter 2 considers how Louis Aragon and Philippe Soupault appropriated the critical poem, as they reviewed books of poetry and films starring Charlie Chaplin. Chapter 3, which examines how Benjamin Peret and Paul Eluard conceived of critical poetry, analyzes their response to poems by Tristan Tzara and paintings by Giorgio de Chirico and Joan Miro. Chapter 4 is devoted entirely to Andre Breton.
