**A Return to the Common Reader**-Adeline Buckland 2017-03-02 In 1957, Richard Altick’s groundbreaking work The English Common Reader transformed the study of book history. Putting readers at the centre of literary culture, Altick anticipated—and helped produce—fifty years of scholarly inquiry into the ways and means by which the Victorians read. Now, A Return to the Common Reader asks what Altick’s concept of the ‘common reader’ actually means in the wake of a half-century of research. Digging deep into unusual and eclectic archives and hitherto-overlooked sources, its authors give new understanding to the masses of newly literate readers who picked up books in the Victorian period. They find readers in prisons, in the barrackrooms, and around the world, and they remind us of the power of those forgotten readers to find forbidden texts, shape new markets, and drive the production of new reading material across a century. Inspired and informed by Altick’s seminal work, A Return to the Common Reader is a cutting-edge collection which dramatically reconfigures our understanding of the ordinary Victorian readers whose efforts and choices changed our literary culture forever.

**Reader Response in Secondary and College Classrooms**-Nicholas J. Karolides 2013-04-15 This text, based on Louise M. Rosenblatt’s transactional model of literature, focuses on the application of transactional reader-response theory in the classroom. It grows from frequent requests from secondary school and college teachers for teaching suggestions on how to put theory into practice. This is not a “What should I do on Monday?” cookbook, but an expression of the practice of theory in college and secondary school classrooms. The chapters portray a spectrum of strategies—including biopoeams, expressive and imaginative writing, journal writing, readers’ theater, role playing, and unsent letters—using as examples individual works from several genres. Recognizing that teachers who may have been trained in other theories and methodologies may be hesitant about their quite different role and expectations in the reader-centered classroom, the authors provide stepping stones to develop readiness and confidence, suggestions, and insights to ease the transition to the transactional model of teaching and learning. Pedagogical features: * An explanatory introduction to each section defines its orientation and describes the content and direction of the chapters it contains. * Invitations elicit engagement of readers with concepts, attitudes, or strategies presented in the chapters; they invite readers, as individuals or members of a small group, to consider ideas or to practice a strategy, among other activities, in order to enhance understandings. * A glossary defines key concepts and strategies discussed in the text. * A bibliography provides an extensive list of resources—books and journal articles—both theoretical and applied. New in the second edition: * Six new chapters—three deal with the roles of film-as-literature in the English classroom, and three with enhancing multicultural understandings. * Updates and revisions to several chapters that appeared in the first edition. * Invitations, new in this edition, have been added to focus and expand readers ‘thinking.

**The importance of being a reader: A revision of Oscar Wilde’s works**-Cristina Pascual Aransáez 2014-09-01 This book explores Wilde’s works from the hypothesis that they call upon the active participation of the reader in the production of meaning. It has a twofold objective: first, it shows that Wilde’s emphasis on the creative role of the audience in his critical writings makes him conceive the reader as a co-creator in the construction of meaning. Second, it analyses the strategies which Wilde employs to impel the reader to collaborate in the creation of meaning of his literary works and casts light upon the social criticism derived from these. The examination of Wilde’s writings reveals how he gradually combined more sophisticated techniques that encouraged the reader’s dynamic role with the progressive exploitation of self-advertising strategies for professional purposes. These allowed the ‘commercial’ Oscar to make his works successful among the Victorian public without betraying the ‘literary’ Wilde’s aesthetic principles. The present study re-evaluates Wilde as a critic and as a writer. It demonstrates that, while Wilde the ‘myth’ was ahead of his time in many ways, Wilde the ‘ARTIST’ anticipated in his aesthetic theory various themes which occupy contemporary literary theoreticians. Thus, it may contribute to give him the status he rightly deserves in the history of literature.

The J. H. Bavinck Reader—Johan Herman Bavinck 2013-06-03 Crucial themes and issues explored by a premier missiologist Johan Herman Bavinck (1895-1964) was a prominent twentieth-century Dutch Calvinist missiologist who wrestled with the tension between religious absolutism and relativism, as many Christians do in today’s pluralistic context. The J. H. Bavinck Reader gathers together a choice selection of Bavinck’s significant writings that are essential for understanding his theology of missions, his approach to world religions, and his religious psychology. His treatment of religious consciousness and Christian faith expands on the brief treatment of it in his own work The Church Between Temple and Mosque. The concluding chapters show how Bavinck’s theoretical reflection on religious consciousness was rooted in his close observation during his years as a missionary in Indonesia. Offering a constructive way forward, Bavinck affirms both the particularity of salvation in Christ and the universality of His hope. A substantial introduction enhances the book with the most thorough biographical sketch of Bavinck available.
