Maritime Security: Counter-Terrorism Lessons from Maritime Piracy and Narcotics Interdiction

E.R. Lucas 2020-08-04 It can be easy to forget the critical role that maritime transport plays in the global economy, but international maritime transportation is still responsible for around 90% of global trade. Protecting the maritime infrastructure essential for this trade from terrorism is a major concern for the international community. This book originates from the NATO Advanced Research Workshop (ARW) Counter-Terrorism Lessons from Maritime Piracy and Narcotics Interdiction, held in Copenhagen, Denmark, in May 2019. Participants in the three-day workshop included policymakers, senior military officers, and academics from NATO member states, international organizations, and two partner nations: Colombia and Israel. Their extensive discussions focused on methods for protecting critical maritime infrastructure, such as ports, supplies, and personnel, from seaborne terrorist attacks. Presentations and roundtables also addressed the human and social factors that contribute to the defense against terrorism in the maritime domain. The book is divided into three sections: organized crime and narcotrafficking; maritime piracy; and terrorism, and aims to bridge the gaps between these three substantive areas of maritime security research. These have remained largely separate areas of research in the past, with the result that valuable maritime security lessons from counter-piracy and counter-narcotics operations have not been
fully incorporated into counter-terrorism best practice. The book facilitates the transmission of lessons learned from counter-piracy and counter-narcotic operations to formulate recommendations for best practice and technological innovations to manage maritime terrorism, and will be of interest to all those working in the field.

**That He Might Be Revealed**-Rhonda G. Crutcher 2015-08-11 Water is a core symbol in the Gospel of John and is particularly prevalent in passages that involve the revelation of Jesus's identity. Using Richard Bauckham’s category of a "Christology of Divine Identity," That He Might Be Revealed explores the way the Fourth Evangelist plays on the memory of the major water events of Israel's history and mythology in order to incorporate Jesus into the divine identity. In the water stories of the OT, the distinctive identity and abilities of Yahweh are at stake. Yahweh's victory in these events forever fuses his identity to water imagery so that control of the waters becomes one of the major markers that characterizes and distinguishes him in Jewish thought. The water imagery in John is the author's attempt to tap into this rich accumulation of images and memories to identify Jesus as God himself incarnate.

**Theodore Powys's Gods and Demons**-Zouheir Jamoussi 2016-08-17 The life of Theodore Francis Powys, the man and the writer (1875–1953), is a story of determined withdrawal from the contemporary world. While his two literary brothers John Cowper and Llewellyn travelled a great deal abroad, Theodore, after early unsuccessful attempts to join the active world, settled into a sedentary life in a remote rural part of Dorset. In his retreat, protected from the outside world by his omnipresent hills, Powys constructed a world, half-real and half-imaginary, in which the man and the writer, reality and fancy and past and present coexisted and sometimes merged. For Powys, fear in its various manifestations, as fear of God, of evil, of death and of self, was a powerful incentive to write and a source of inspiration for almost everything remarkable in his writings. It did not take Powys long to realize that allegory was a literary genre better suited to his literary leanings and peculiar turn of mind than the realism of his early novel-writing ventures. Under the combined influence of the Bible, Bunyan and Hawthorne, he adapted allegory to his specific literary purpose. In that regard, two distinctive aspects of his allegorical stories, namely supernatural visitors and animal symbolism, generally overlooked by his critics, deserve close attention, and are the special focus of this book. Few writers have been so strongly and avowedly marked by so many literary and philosophical influences as Powys. These range from the Bible, Bunyan and Hawthorne to Darwin, Hardy, Lawrence and Freud. However, Powys’s short stories, fables and novels also stand as a unique and original achievement. Indeed, the influence he himself exerted on some novelists of the younger generation, such as William Golding, testifies to the power and originality of his writings.

**The End of Individualism and the Economy**-Ann E. Davis 2020-02-05 Individualism has been one of the driving forces in the rise of modern capitalism, and methodological individualism has been dominant in social science for many years. In this paradigm the economy is seen as a machine to routinize production and improve efficiency, and the discipline of economics has come to focus on control and automation. Recent innovations in natural and social sciences, however, indicate a shift in thinking away from individualism and towards interconnectedness. The End of Individualism and the Economy: Emerging Paradigms of Connection and Community traces the origins of “the individual” in history, philosophy, economics, and social science. Drawing from linguistic philosophy, there is increasing attention to language as a social substrate for all institutions, including money and the market. One irony is that the "individual" is a key term, related to distinct institutions and associated expertise; that is, "the individual" is social. The book explores the influence of individualism in the subversion of class consciousness, the view of impersonality as a virtue, and the rise of financialization. The founding assumption of economics, the rational autonomous individual with exogenous tastes, undercuts social solidarity and blocks awareness of interconnections and interdependencies. The text looks forward and embraces the new paradigms and alternative forms of governance, economics, and science which can be developed based on collectives and communities, with new values, frameworks, and world views. This work is suitable for academics, students, scholars, and researchers with an interest in economic and social collectives and methodological individualism, as well as those studying the connections between economics and other disciplines in the social and natural sciences.
The Qur’an-Massimo Campanini 2010-10-04 The Qur’an: Modern Muslim Interpretations offers a lucid guide to how Muslims have read the Qur’an in the twentieth and twenty-first centuries. Massimo Campanini explores early approaches to the understanding of the Qur’an, including that of the Salafis and the construction of the Islamic Renaissance Movement, contrasting the development of traditionalist and ‘scientific’ interpretations and examining the work of the phenomenologists who followed. This lively book explores the radical ideas of Sayyid Qutb and his followers, a significant part of what is known as political Islamism, and investigates the idea of exegesis as a liberation theology, through the work of Esack and Wadud. Students taking courses on the interpretation of the Qur’an will find this an invaluable aid to their study, and it is essential reading for all those interested in how Muslims have understood the Qur’an in the contemporary period.

Critical Reflections on Transnational Organized Crime, Money Laundering and Corruption-Margaret E. Beare 2003-01-01 Contributors offer a wide range of challenges to commonly-held views on transnational crime and approaches to fighting it, suggesting that current international policies follow an American model that exaggerates its threat out of proportion.

On the Edge of the Auspicious-Mary M. Cameron 1998 People of lower caste live throughout the villages of Nepal but have been noticeably absent from ethnographic accounts of the Himalayan region. Starting from the perspective of lower-caste Hindu women, Mary M. Cameron offers a long-overdue study of artisans and farmers in western Nepal. On the Edge of the Auspicious skillfully shows the connections between caste hierarchy and gender relations leading to domestic, economic, and religious power of lower-caste women. Situating her study in the history of land ownership and contemporary family and work relations, Cameron explains how and why patriarchal ideology associated with high-caste families in Nepal does not apply to women of lower caste. Drawing on data from work, family, and religious domains, this ethnography goes further than other current studies of caste hierarchy in South Asia to show the everyday material and ideological dimensions of domination and lower-caste people's resistance to them.

The Gospel according to Star Wars, Second Edition-John C. McDowell 2017-09-07 In a new and updated version of this best-selling book, John McDowell explores the many spiritual themes that weave throughout the Star Wars films. From the Force to the dark side, the issues discussed in the films have a moral and spiritual complexity that, if paid attention to, can help us better understand our place in the world and our relation to others and to God. George Lucas, the creator of Star Wars, did not intend for his films to be mere entertainment, McDowell argues. Rather, he hoped his films would be used as a vehicle for moral education. This new version has been thoroughly revised to include discussion of The Force Awakens and other new developments in the Star Wars universe.

The Gospel according to Science Fiction-Gabriel McKee 2007-01-02 In
this thorough and engaging book, Gabriel McKee explores the inherent theological nature of science fiction, using illustrations from television shows, literature, and films. Science fiction, he believes, helps us understand not only who we are but who we will become. McKee organizes his chapters around theological themes, using illustrations from authors such as Isaac Asimov and H. G. Wells, television shows such as Star Trek and The Twilight Zone, and films such as The Matrix and Star Wars. With its extensive bibliography and index, this is a book that all serious science fiction fans--not just those with a theological interest--will appreciate.

**Politeness**-Richard J. Watts 2003-09-25 During the last fifteen years, existing models of linguistic politeness have generated a huge amount of empirical research. Using a wide range of data from real-life speech situations, this new introduction to politeness breaks away from the limitations of current models and argues that the proper object of study in politeness theory must be commonsense notions of what politeness and impoliteness are. From this, Watts argues, a more appropriate model, one based on Bourdieu's concept of social practice, is developed.

**Western Rationality and the Angel of Dreams**-Murray Lionel Wax 1999 Throughout recorded time people have been fascinated by dreams and their meanings. Tribal societies valorize knowledge obtained from dreams and respect possession as a channel for revelation. In contrast, implicit in Western intellectual thought is an image of the human as a non-social atom with a unitary and rational mind, which turns dreaming into an epiphenomenon or, for Freud, a neurosis in miniature. Integrating materials from anthropology, post-Freudian psychoanalysis, social evolution, and the social psychology of Mead, Cooley, James, and Sullivan, this book offers a view of the self and the psyche that provides meaning to the views of traditional peoples on dreams, possession, and the loss of self.

**Changing Art into Research**-Jocene Vallack 2020-07-23 Changing Art into Research: Soliloquy Methodology presents a research methodology that enables inquiry into one’s personal experiences in an endeavour to reveal essential commonalities of human experience. Arts-informed research methods are becoming increasingly popular with scholars in Arts, Education and the Social Sciences, but there is often confusion about how to turn arts practice into rigorous inquiry. This book examines the theoretical perspectives needed to inform these research approaches, which are often missing in methods teaching and research. Soliloquy is a new methodology that interprets and applies Husserl’s philosophical concept of Transcendental Phenomenology. It marries together the synthesizing powers of the unconscious mind with the analytical capacities of conscious cognition and articulation. It further explores the possibility that both cognitive and intuitive ways of knowing are valid and appropriate for academic inquiry, provided these methods are aligned through a philosophically consistent, theoretical framework. This book will be of great interest to academics and postgraduate students engaged in arts-based qualitative research and those doing an arts-based practice dissertation.

**Body-Poetics of the Virgin Mary**-Jane Petkovic 2021-05-25 The Judeo-Christian scriptures understand humans as being made in the image of God. What exactly does this mean? Basic agreement is that it means humans can only know and understand themselves in relation to God. If, however, this God is pure uncreated spirit, where does human embodiment fit in? Is it an obstacle to understanding? Or is it in some way instructive? John Paul II comes down decisively in favor of the body's value and importance. In his catechetical series, widely known as the Theology of the Body, John Paul II analyzes what is distinctive about human beings. He undertakes a "reading" of the body. This book reflects on John Paul II's interpretation, extending his findings to the Virgin Mary. Her specifically female, maternal body is seen to offer insights into how the body images God--in how it "speaks." The transformations of the female body parallel the transformations of language in poetry. The reconfigurations and accommodations of the gestational body are, this book suggests, poetic incarnations of God-likeness. Body-Poetics of the Virgin Mary offers a Mariological slant on theological anthropology and a new way to think of how humans poetically image God.

**Misthological Models Part 3**-Marty A. Cauley In preparation for the heart of the discussion, which focuses on the identity of the Bride of Christ, Misthological Models Part 3 (MMP3) begins by reiterating, expanding, and confirming the earlier analyses in this series regarding the already-not-yet duality found in multiple biblical themes, such as the present mystery form of the kingdom. MMP3 is primarily a counter to Dillow’s use of synecdoche to argue that the Bride is composed of all believers, only some of whom are properly clothed. Appeals to synecdoche are encouraged within MMP3. In fact, both Dillow and MMP3 appeal to synecdoche regarding the Bride. But MMP3 documents the abuse of the synecdoche argument by limited-atonement advocates and Lordship Salvationists and demonstrates that Dillow’s position has similar shortcomings. MMP3 shows that proper use of synecdoche confirms that the Bride is only composed of some of the saints in contradistinction to Dillow’s claim that only part of the Bride is properly clothed. Additionally, MMP3 argues that only faithful believers have co-glorified bodies that are suitable to being bridal co-rulers. Thus, externally and internally, only faithful believers qualify as the Bride of Christ. Only they fulfill the terms of the bridal contract and thus consummate the misthological union.

**The Gospel of John and the Sociology of Light**-Norman R. Petersen 2008-12-09 This provocative study of the language of the Fourth Gospel pursues the complicated but intriguing thesis that the Gospel's language is a blend of everyday, ordinary language and a special language suitable to the Johannine community. This special language transforms the ordinary language in a way that makes it into an anti-language. The oppositional character of the language, then, functions socially to distinguish the Johannine believers from their opponents. By addressing the perplexing issue of the language of the Fourth Gospel in a way that has not yet been done, Professor Petersen has made his work essential for specialists in New Testament and especially in Johannine studies. The work deals with the literary, historical, and sociological features of the Fourth Gospel. Its use of diverse methodologies is one of the book's extraordinary values, reflecting the current need for interdisciplinary efforts in Johannine studies.

It is not a Festschrift in the usual sense of the word, but more of a collection of articles which represent a very specific way of defining and viewing language and linguistics. The specific approach presented in this volume has its origins and inspirations in the theoretical and methodological paradigm of European Structuralism in general, and the sign-oriented legacy of Ferdinand de Saussure and Charles Sanders Peirce and the functional and communication-oriented approach of the Prague School in particular. **Adolescents and War** - Brian K Barber 2009-10-22 Experts aim to understand and document the intricacies of youth who have been involved in political violence. **Religio Duplex** - Jan Assmann 2014-02-18 In this important new book, the distinguished Egyptologist Jan Assmann provides a masterful overview of a crucial theme in the religious history of the West - that of 'religio duplex', or dual religion. He begins by returning to the theology of the Ancient Egyptians, who set out to present their culture as divided between the popular and the elite. By examining their beliefs, he argues, we can distinguish the two faces of ancient religions more generally: the outer face (that of the official religion) and the inner face (encompassing the mysterious nature of religious experience). Assmann explains that the Early Modern period witnessed the birth of the idea of dual religion with, on the one hand, the religion of reason and, on the other, that of revelation. This concept gained new significance in the Enlightenment when the dual structure of religion was transposed onto the individual. This meant that man now owed his allegiance not only to his native religion, but also to a universal 'religion of mankind'. In fact, argues Assmann, religion can now only hold a place in our globalized world in this way, as a religion that understands itself as one among many and has learned to see itself through
the eyes of the other. This bold and wide-ranging book will be essential reading for historians, theologians and anyone interested in the nature of religion and its role in the shaping of the modern world.

**Pragmatic Aspects of Scalar Modifiers** Osamu Sawada 2018-01-07 This volume examines the meaning of scalar modifiers - expressions such as more than, a bit, and much - from the standpoint of the interface between semantics and pragmatics. In natural language, scalar expressions such as comparatives, intensifiers, and minimizers are used for measuring an object or event at a semantic level. However, cross-linguistically scalar modifiers can often be used to express a range of subjective feelings or discourse pragmatic information at the level of conventional implicature (CI). For example, in English more than anything can signal the degree of importance of the given utterance, and in Japanese the minimizer chotto 'a bit' can weaken the degree of imposition of the speech act. In this book, Osamu Sawada draws on data from Japanese and a range of other languages to explore the dual-use phenomenon of scalar modifiers: he claims that although semantic scalar meanings and CI scalar meanings are logically different, the relationship between the two makes it crucial to examine them both together. The volume provides a new perspective on the semantic-pragmatics interface, and will be of interest to researchers and students of Japanese linguistics, semantics and pragmatics, and theoretical linguistics more generally.

historical play glorifying Mao’s supremacy to a playwright calling for individualism and women’s rights. This book not only depicts aspects of drama in the People's Republic of China, it also provides analyses of the political and social conditions that shaped and are represented in this drama.

Dead Letters to Nietzsche, or the Necromantic Art of Reading Philosophy - Joanne Faulkner 2010-04-28 Dead Letters to Nietzsche examines how writing shapes subjectivity through the example of Nietzsche’s reception by his readers, including Stanley Rosen, David Farrell Krell, Georges Bataille, Laurence Lampert, Pierre Klossowski, and Sarah Kofman. More precisely, Joanne Faulkner finds that the personal identification that these readers form with Nietzsche’s texts is an enactment of the kind of identity-formation described in Lacanian and Kleinian psychoanalysis. This investment of their subjectivity guides their understanding of Nietzsche’s project, the revaluation of values. Not only does this work make a provocative contribution to Nietzsche scholarship, but it also opens in an original way broader philosophical questions about how readers come to be invested in a philosophical project and how such investment alters their subjectivity.
