Narrative of Identity-William Taylor 2014-10-16 The relationship between the Syrian Orthodox Church in the Ottoman Empire and the Church of England developed substantially between 1895 and 1914, as contacts between them grew. As the character of this emerging relationship changed, it contributed to the formation of both churches as ‘narrative churches’. The order in which this took place was a period of international tension, in particular, within the Ottoman Empire, culminating in the outbreak of the First World War, effectively bringing this phase of sustained contact to an end. Narratives of identity make use of Syriac, Garshuni, and Arabic primary sources from Syrian Orthodox archives in Turkey and Syria, alongside Ottoman documents from the Babajkash Osman Arjey, Istanbul, and a range of English archival sources. The reconstructions of both churches are analysed, using a philosophical framework provided by the work of Paul Ricoeur, especially his concepts of significant memory (anamnesis), translation, and the search for mutual recognition. Anamnesis and translation were extensively employed in the formation of ‘narratives of identity’ that need to be understood as distinctive structures. The identity claims of the McCartney’s Action of the Church of England and of the Ottoman Syriac Orthodox Church are examined using the framework of the detailed content of the theological dialogues, which is then examined, and placed in the context of the rapidly changing religious geography of the middle east, including the Ottoman Syrian Orthodox, both from within and from without. Finally, a new teleological framework is proposed in order to better understand these exchanges, taking seriously the anamnetic insights of the narratives of identity of both the Syriac Orthodox Church and the Church of England from 1895 to 1914.

Wicca and the Christian Heritage-Joanne Pope Pozzobon 2007-05-03 What is Wicca? Is it witchcraft, Paganism, occultism, esotericism, magic, spirituality, mysticism, nature religion, secrecy, gnostic, the erotic, or ‘other’? Wicca has been defined and explored within all these contexts over the past thirty years by anthropologists, sociologists and historians, but there has been a tendency to confine and negate the role of Christianity in Wicca’s historical and contemporary contexts. Joanne Pope Pozzobon ‘reveals the hermeneutics of Christianity’ to uncover the hidden history of Wicca. Exploring the problematic nature of the Wiccan claim of marginality, it contains a study of Wiccan theology and its underlying theoretical framework.
