**The Stolen Dream** by John Devaney 2019-07-24 The book examines a period when football underwent a seismic and ineradicable change brought about by the determination of the Victorian Football League to wrest control of the game's development and destiny from the various state controlling bodies and the Australian Football Council. Whereas the VFL had initially been the first among equals, it gradually assumed the role of the sole and undisputed guardian of the code. The AFC, once football's ostensible national controlling body, became an irrelevance. Instead of a national sport with a national remit we ended up with an expanded VFL with a majority of Victorian member clubs supplemented by a token sprinkling of teams from interstate. Such teams were in most cases created from scratch and could in no way be said to derive directly from the states? unique and distinctive football traditions and culture. For some, it was a brave new world, but evolution does not inevitably entail improvement.

How We Use Stories and Why That Matters - John Hartley 2020-01-23

Using compelling examples and analysis, How We Use Stories and Why That Matters shows what the New York Shakespeare Riots tell us about class struggle, what Death Cab for Cutie tells us about media, what Kate Moss’s wedding dress tells us about authorship, and how Westworld and Humans imagine very different futures for Artificial Intelligence: one based on slavery, the other on class. Together, these knowledge stories tell us about how intimate human communication is organised and used to stage organised conflict, to test the ‘fighting fitness’ of contending groups – provoking new stories, identities and classes along the way. This book guides the reader through the tangled undergrowth of communication and cultural expression towards a new understanding of the role of group-mediating stories at global and digital scale. It argues that media and networked systems perform and bind group identities, creating bordered fictions within which economic and political activities are made meaningful. Now that computational and global scale, big data, metadata and algorithms rule the roost even in culture, subjectivity and meaning, we need population-scale frameworks to understand individual, micro-scale sense-making practices. To achieve that, we need evolutionary and systems approaches to understand cultural performance and dynamics. The opposing universes of fact (science, knowledge, education) and fiction (entertainment, story and imagination) – so long separated into the contrasting disciplines of natural sciences and the humanities - can now be understood as part of one turbulent sphere of knowledge-production and innovation.

Pride - Ibi Zoboi 2018-09-18

Pride and Prejudice gets remixed in this smart, funny, gorgeous retelling of the classic, starring all characters of color, from Ibi Zoboi, National Book Award finalist and author of American Street. Zuri Benitez has pride. Brooklyn pride, family pride, and pride in her Afro-Latino roots. But pride might not be enough to save her rapidly gentrifying neighborhood from becoming unrecognizable. When the wealthy Darcy family moves in across the street, Zuri wants nothing to do with their two teenage sons, even as her older sister, Janae, starts to fall for the charming Ainsley. She especially can’t stand the judgmental and arrogant Darius. Yet as Zuri and Darius are forced to find common ground, their initial dislike shifts into an unexpected understanding. But with four wild sisters pulling her in different directions, cute boy Warren vying for her attention, and college applications hovering on the horizon, Zuri fights to find her place in Bushwick’s changing landscape, or lose it all. In a timely update of Jane Austen’s Pride and Prejudice, critically acclaimed author Ibi Zoboi skillfully balances cultural identity, class, and gentrification against the heady magic of first love in her vibrant reimagining of this beloved classic.
